online sales channels, leading to rapid growth of its Wechat-commerce platform during the Period. As to the OEM business, the Group recorded a steady year-on-year growth of 7.7% in the segment revenue to RMB170.6 million and the number of active OEM customers jumped from 33 to 39.

Mr. Yang Ziyuan, Chairman and Chief Executive Officer of Tianyun International, said, “In the first half of 2016, the Group maintained its strategy to develop the two core businesses in parallel, while proactively broadening its online and offline sales channels and expanding the business into overseas markets. With our unremitting efforts, the Group has once again achieved satisfactory results despite the challenging operating environment. We have received national recognition for our commitment to product quality and become the first and the only processed fruit manufacturer in the industry to be awarded the title of ‘China Quality Canned Food Certification Mark’ for our preservative-free processed fruit products, setting a new benchmark in the industry.”

Chairman Yang added, “In light of the increasing demand for quality processed fruit products from domestic and overseas consumers, the Group will continue its strenuous efforts to consolidate our own brand product business. In the second half of 2016, in addition to introducing certain tropical fruits and developing healthy products to enrich our product mix, we are also planning to launch online tailor-made products to expand our diversified services. Looking ahead, the Group will seize the opportunities arising from industry consolidation by identifying the best merger and acquisition targets and improving our production capacity, so as to enhance our long-term competitiveness and profitability, ultimately create superior returns for shareholders.”
