天韵國際控股有限公司
Tianyun International Holdings Limited
(Stock code : 6836.HK)

**The Group's Subsidiary Shandong Tiantong Food applies solar photovoltaic (PV)
power generation project
For renewable energy development and environmental protection to achieve
A low-carbon economy**

(Hong Kong, 2 August 2017) **Tianyun International Holdings Limited (“Tianyun International”, together with its subsidiaries, the “Group”) (Stock code: 6836.HK)**, a leading seller and manufacturer of processed fruits products in China, is pleased to announce that the Group's subsidiary Shandong Tiantong Food Co.,Ltd. (“Shandong Tiantong”) has invested in the construction of solar photovoltaic (PV) power generation project with total planning area reaching 24,000 square meters. The project has been officially put into use in late June, is currently running well, with an estimated annual reduction in carbon dioxide emissions of greenhouse gases of approximately two million kg. The Group aims to demonstrate its concern about global warming and to appeal to the community to make the best use of the renewable energy.

In view of the environmental-friendliness of green energy, the Group wisely uses its idle roof to establish solar photovoltaic power generation system, to develop renewable energy, support for the national environmental protection emission reduction policy. This power supply system was being put in use during the peak consumption period of electricity in mainland China. Solar energy generators can not only be used as a convenient source of rechargeable energy, but also as an emergency backup power supply. According to the current designed capacity of the system, it is estimated that the annual production of electricity could reach to approximately 2.5 million degrees. If we consider an average of 0.79 kg of carbon dioxide emission per use of one kilowatt hour traditional electricity, this solar unit can save nearly 2 million kg carbon dioxide emissions per year. This project can not only improve the energy consumption efficiency of the enterprise, but also help protect the environment of the surrounding community.

Mr. Yang Ziyuan, Chairman and Chief Executive Officer of Tianyun International, said, “In 2016, the Group was recognized by the China Canned Food Industry Association with products identified as the “Zero Added Preservative Canned Products” and thereby becoming the only fruit processor in the industry to win the qualification of “China Canned Product Quality Certification Label”. This

shows our commitment on ensuring the quality of our fresh fruit processing products. As a responsible enterprise with social awareness, the Group actively responds to the call for national energy conservation and works best at ensuring low-carbon practices in terms of production and energy consumption. We will continue uphold our value in the production of natural, healthy and safe food, achieve low-carbon economy, and to keep in mind our social responsibilities while developing and growing our business.”
